In its 105th year of serving our membership and our signatory contractors, Local 412 has seen many changes throughout the years and will continue to prosper as we transition to a new phase in our Local’s life.

Every member needs to take into consideration that the Local belongs to all of us. Being a 412 member has many benefits including health care, pensions, training, a livable wage, and safe working environments.

Our signatory contractors are our partners. We must ensure that our skills and productivity are second to none. If we can’t be an asset on the job, we must improve our skills to do so. We must be productive on the job every day, qualified and skilled workers are always in demand. We are all in this together!

In the January 2015 issue of the UA journal, General President Bill Hite stated in his report, “Anyone who thinks that a union card guarantees a job without skills and being productive is mistaken.” Our training department has classes scheduled to update your skills, therefore, we must go after all UA work in all sectors and protect our jurisdiction. To do so we need to be the best trained and most productive pipe trades craftsmen.

I urge you to stay strong and feel positive about the future of Local 412. Embrace and learn from our past, but be ready to adapt and change for the future.

-Larry Abril, UA Local 412 Trustee
**USEFUL EMPLOYMENT TIPS**

- When receiving a work referral, always bring in your Driver’s License, State Journeyman License, and any other documentation as requested by the Dispatcher.

- Always turn in your work referral to the company. This tells the company how you get paid.

- Keep paycheck stubs. This may be useful for tax purposes.

- Local 412 is not your employer, the company you are working for is.

- Dues and Death Assessment deductions take up to 3 months to report into Local 412. Please CONTINUE TO PAY during this lag time! This money will not back-pay any Union Dues and/or Death Assessments owing. Local 412 is not responsible for any dues not paid and/or suspension fees ensued.

- Insurance benefits start after 390 working hours. Please contact Zenith American Solutions at (505) 881-3141 for more information.

- Remember to call Local 412’s Job Line or come into the main office to get on the Out-of-Work list when the job is completed and you have the termination slip in your possession.

- If you receive a Reduction-of-Force and worked less than 21 consecutive calendar days, you will retain your same place on the Out-of-Work list.

- Always keep your address and phone number updated!

I am personally very glad to see us getting back to at least some type of normal operations. Our local has gone through many changes over the past 18 months. Everything we have known for over 100 years has changed. Although it has been difficult, I know we will be stronger and more focused than ever, for with change, comes rebirth and strength.

The work seems to be picking up slightly. We have received several calls for Plumbers and Apprentices, mainly for State Prevailing Wage Rate Projects throughout this area. We also had calls for LANS, JBH and Yearout in Los Alamos. It looks like the economy may be turning around and this trend will continue.

During the recent legislative session, all of labor was under attack. We may have won the battle, but rest assured the war is not over. We will continue to be under attack as long as we have a republican Governor and House of Representatives. We all need to vote in the upcoming election and elect legislators who support our issues.

At the end of the day, I believe we all want the same thing today as we did the day we proudly took our oath to this great organization. Which is, continue to fight for all worker’s rights, be there for its members, and grow to be a force in the Labor Movement for at least another hundred years!

**GEORGE RILEY**  
*Four Corners*

We have been fortunate to maintain a fairly steady stream of dispatches over the past year or so during outage and non-outage periods as well. As always, welders have been in short supply, especially Tig and Heavy Wall. Therefore, I would encourage all interested parties to test and certify. We are currently beginning the spring outage at San Juan Generating Station. Contractors expected to be calling for manpower needed for this outage. Babcock and Wilcox, Day and Zimmermann and Graycor will maintain crews after the outage work is done and we will be hopeful to keep a significant presence of manpower at that facility. The fall outage will also be a major overhaul on Unit 4 and we hope to have an increase of work calls during that time. Units 2 and 3 will not be brought down for maintenance for the expected remainder of their lives, as the PNM and State Environmental plan calls for shuttering these units in December of 2017. Yearout Industrial will also be making a pres-
The Four Corners Power Plant has also been keeping our members working in the area. Babcock and Wilcox has had steady work for fitters and welders for the most of last year and are projected on the same path for this year as well. Work calls, outages, and Capital projects kept Chicago Bridge and Iron, with fitters and welders ranging from 15 to 50 people employed at that facility all of last year. They have a 10-day outage scheduled to begin within the next few weeks and a major overhaul scheduled for Unit 4 in the fall. My latest report is URS was awarded the SCR emissions control project for the Four Corners plant. The APS planners have stated that URS will self-perform and will be subcontracting some of the work to Union shops on the project. Work is scheduled to begin this spring and completion due early 2018.

Our Albuquerque plumbing shops have been picking up work in the area this year. MBI is finishing up the Energy Center at San Juan College and began working on a vast school project at Northeast Elementary. They are waiting until school is out to start the three-year Farmington High School project and were awarded school projects in Gallup and Zuni. Hanna has also picked up work at the Southern NM/W. Texas area for the last year has been slow. Work in Southern New Mexico and West Texas area for the last year has been slow. H-Y Tech is down to 10 or 12 hands and is about finish up at the LES plant in Eunice. Donner has two small jobs down here; one in Hobbs with about 10 hands and one in Roswell with about 5 hands. CD Mechanical has two jobs; one at White Sands with 3 hands and just picked up a new job in Las Cruces that has not started yet. Enoch Mechanical is down to three jobs; one in Silver City that is almost finished, one in Truth or Consequences that is on hold until the concrete is poured, and a small job at the Gaston High School. B & H Mechanical has five jobs, four of them are at NMSU and one at Las Cruces High School with a work force of 20 hands. Mid-West Mechanical will be starting the underground work on the hospital in El Paso. They will start off with plumbers. The job is expected to last for a couple of years. Keep in mind, this hospital is in Texas and if you are interested in working on it, you will need to get your Texas plumbing license or at least a Texas plumbing apprentice card. You can get the paperwork to from the Training Center or myself.

SCOTT LEFEVRE
Southwest Pipe Trades Organizer
The organizing effort for Southwest Pipe Trades is picking up as many locals have slowed down through the November to January months. The welding side of the pipe trades is now picking up in the Gulf Coast. With several projects starting, a demand for welders is growing. If you are interested, make sure you are able to pass the gate test for the project. Our agents can advise you of the weld test standard for these jobs as well as get you a referral to the project. Take advantage of the Training Center to practice for these weld gate tests.

The HVAC side of the trade is growing in demand. The service industry is the key to surviving in today’s economy and it offers our members long-term steady employment.

We have to be effectively trained and more efficient than our non-union counterparts. I ask all of you to sign up for the continuing education classes. Please remember, we sell ourselves as skilled licensed journeymen.

Trust Funds

All of our trust funds are doing well (see sidebar). The entire membership was duly notified in March 2015. Recently, the Trustees voted to make proactive changes to the retiree health and welfare self-pay rates. Changes were made to help stabilize the fund, a balance of $28,479,000.00 equates to approximately 44 months of cushion. Had these changes not been made, the fund could go bankrupt in ten years. The change takes into account how long someone has been a member. It also does not affect any member who retires or has retired prior to April 1, 2015.

Retirees Notice

Effective on June 1, 2015: Local 412 will no longer reduce dues for Retirees who are under the age of 65. Any member retired on or before May 31, 2015 will remain at the reduced retiree rate upon Local 412 receiving required National Pension documentation. Members who turn 65 years old will automatically have their dues reduced as per the Constitution of the United Association, Section 130. This will not affect any member who is already 65+ years old. These members will remain at their already current reduced rate.
**Union Hall Renovation**

The Local 412 Union Hall was severely damaged by a storm in July of 2013. However, a contract was awarded to JB Henderson thereafter to perform repairs. Due to the fact the hall was built in 1959, many necessary improvements were made. This included electrical, plumbing, and an upper and lower roof replacement with a 30-year warranty. Other upgrades that were performed included new paint, signs, wood/stone work, furniture, office equipment upgrades, landscaping, as well as carpet, tile, and flooring. Much of the work was done by volunteer labor which included journeyman, apprentices and office staff. The hall is now structurally current, aesthetically refreshed, and functionally updated to make way for the future of 412. Thank you to everyone who helped make our Union Hall something to be proud of!
New Dispatching and Job Line Rules

UA Local Union No. 412’s Hiring Hall Job Line Automated Phone System Rules

Local 412 has implemented a new dispatching procedure and Job Line. The month of April will be a trial period for both members and staff. Please read the information on “How to use the Job Line System” (left) as well as the following “New Dispatching and Job Line Rules”. **PLEASE NOTE: The new Dispatching procedure will officially take effect May 1, 2015.**

Local 412 will maintain a Job Line automated phone system. Referral information will be placed, when applicable, on the Job Line phone system.

This system will deliver instructions to the Applicant, regarding how to access the system using his/her personal identification number (Union Card number or Social Security Number). Once an Applicant has gained access, they will be able to review and apply for all available job referrals.

Whenever an Employer requires a journeyman or apprentice, plumber or pipefitter, welder, service worker on any job, he shall notify the Business Manager of the Local Union or the representative designated by said Business Manager at the Local Union office by Local Union No. 412’s Manpower Request Form, stating the location, starting time, approximate duration of the job, the safety requirements, the type of work to be performed and type of workers needed (Pipefitters, Plumbers, Steamfitters, Welders, HVAC or Refrigeration), and the number of each type of worker required. Employers requesting an Applicant must do so before 2:30 p.m. in order for the job to be cycled through the Job Line that same day. Requests received after 2:30 p.m. will be processed on the Job Line the following business day.

An Applicant seeking referral shall call the Job Line toll-free at (844) 8-JOB-412 or (844) 856-2412 from 4:30 p.m. until 8:00 a.m., Monday through Friday and all day on Saturdays and Sundays. After listening to the job referral information, the Applicant will be instructed to press certain keys on his/her phone to be considered for any job(s) listed. If an Applicant changes his/her mind, he or she may call back to the Job Line and edit their selection, prior to 8:00 a.m., in order to delete or remove his/her name from consideration. Only qualified Applicants should use the Job Line and they may not authorize anyone to use it on their behalf.

It is the responsibility of the Applicant to be available after 8:00 a.m. the following business day so that the Business Manager or designated representative can contact the considered Applicant(s) in the order his/her name appears on the out-of-work list to obtain confirmation of job acceptance. If the Business Manager or designated representative cannot reach the Applicant at the telephone number left by the Applicant, the Union Representative will call the next Applicant requesting job referral.

An Applicant can refuse a job after they have accepted the job on the Job Line. After the Applicant refuses three (3) jobs, the Applicant’s name will be moved to the bottom of the out-of-work list.

CBA Notice

As you may be aware, the Centennial Labor Agreement, which became effective April 1, 2010 was scheduled to expire on March 31, 2015. On December 12, 2013, a Special Agreement Addendum was approved and will remain in effect until April 1, 2016 or until a new CBA is properly negotiated with the MCA. There was also an M.O.U. (Memorandum of Understanding) signed on December 12, 2013, for all State Prevailing Wage Rate projects. This M.O.U. will remain in place until the issues we have had with SB 33 are resolved.

Current and Former Nuclear Weapons Workers

Q: Do you or a member of your family have an illness such as cancer, beryllium disease, or another condition, which you think may have been caused by toxic exposure in the workplace?

Q: Were you employed at a Department of Energy facility, with a beryllium vendor, or in the uranium mining industry?

IF YOU ANSWERED YES:

You may be eligible for benefits under the Energy Employees Occupational Illness Compensation Program Act (EEOICPA).

The EEOICPA is administered by the U.S. Department of Labor. It provides monetary compensation and medical benefits to individuals who became ill as a result of working in the nuclear weapons industry. Survivors of qualified workers may also be entitled to benefits.

During the recently completed legislative session, there was an attack waged on all of organized labor, the likes of which we have not seen since the late 70s. Governor Martinez and the republican led house, introduced five separate Right to Work bills, they also introduced, two separate bills that severely impact State Prevailing Wages Rates, and two bills that would affect State Workers Compensation. We fought this battle with every recourse we had, the NMBCTC had five full time lobbyists at the session every day, all of the sixteen affiliates had Managers, agents and relief staff at the Capitol as needed, the State Federation of Labor had several relief staff in from around the Country, and the Public Sector Unions were on board as well. It is good to see labor be organized and all on the same page for a common cause. I requested funding from both the UA, (we did receive $50k from the UA) and National Building Trades to help offset some of the costs.

Information for Working at San Juan Generating Station (PNM)

San Juan Generating Station (PNM) requires that all people accessing the plant site MUST first successfully complete the school of energy safety course online.

If you took the course prior to September 1, 2014 then it is no good anymore and you must take it again to get in the gate. This course cannot be taken on site anymore. If you show up at the gate without completing this course first, you will be turned away. There are no exceptions to this.
